Profile

Engineer with a passion for creating performant and scalable web experiences. Developing with the mindset to serve my clients and teammates alike.

Experience

Midwestern Interactive

Sept 2021 -

Worked on various clients projects as an embedded team member, quickly acclimating to different development environments.

- Develop and maintain client applications to meet product launch deadlines.
- Refactor code bases to increase performance, improve readability, and allow reusability.

Skills

TypeScript
React
Vue
NodeJS
PostgreSQL
GraphQL
Docker
Kubernetes
Version Control
CI/CD

Projects

Remine - Work

Remine is an application dealing with big data in the real estate business. Primarily providing solutions for realtors to work with MLS listings from various areas around the US.

Fours - Personal

Online multiplayer connect 4 web application built using React, XState, NestJS, Socket.IO, and Three.js. Originally created to learn microservices in NestJS, it morphed into a more long term project to better my skills engineering and architecting skills.
